Material state
$F,\ z = (s, h, f)$
Objective energy
$W = e^s E_0 \sum_j c_j(h, f) b_j(F)$
Derived response
$P = \partial W / \partial F$
$M\ddot{u} = -\nabla_u \Pi$
Invariant basis
Isochoric shape
+ volume
Tiny shared decoder
2 → 16 SiLU → 7
Positive coefficients
