Same observed tip displacement. Different response to a new interaction.

Initial tip push

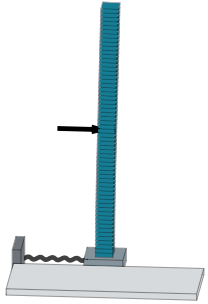

A: 10.00 mm

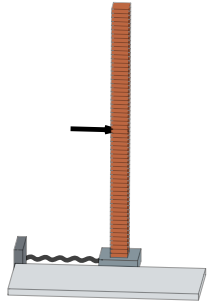

B: 10.00 mm

New halfway push

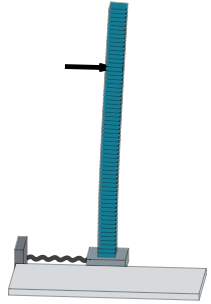

A: 3.00 mm

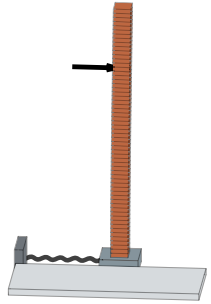

B: 8.25 mm

Held-out third location

A: 5.38 mm

B: 8.84 mm

A: 80% bending / 20% base motion B: 20% bending / 80% base motion

20 mN lateral load; actual scale. Full stems shown for explanation; initial inference observes only the tip.
